Program Manager Metropolitan Cities

Metropolitan Cities an innovation region of tomorrow

With over ten million inhabitants, the Rhine-Ruhr metropolitan region forms a structurally closely interlocked community with enormous economic and innovation potential. The more than 520.000 students and the biggest start up scene in Germany the region has the opportunity to do much more. In order to grow the cities of the region closer together, the realization of supraregional mobility is necessary. This requires the consistent networking of existing and new mobility concepts into a complete system. The presentation shows first approaches and solutions for the development of an innovation region of tomorrow.

since 2018 Program Manager Metropolitan Cities and
